TRUCKERS FIGHT FOR THE MARKET

Half a Hundred Fruit Growers in the Upper Part of Adams County Sign Petition to Have Curb Market Continued. Their Reasons.

Voicing their sentiments against the proposed abandonment of the Gettysburg curb market the truckers of the upper end of Adams County have gotten together and a petition signed by more than fifty prominent residents of that section will be presented to the next town council meeting for the continuance of the market. The petition says:

"We, the undersigned truckers and fruit growers of Adams County, do hereby petition your honorable body to grant us a curb market such as we have had in the past two years,

"First, because we feel it a just petition.

"Second because we cannot haul as large a quantity of marketing if we are compelled to go from house to house and cannot display our loads.

"Third, because we believe a majority of the town residents are in favor of a curb market.

"Fourth, because it (abandoning the market) will require two persons with each wagon, thereby adding to the cost of production.

"Fifth, we the truckers and fruit growers of Adams County, will not raise as many vegetables for market if we are compelled to peddle."

A committee composed of R. W. Taylor, John Garretson, Isaiah Knouse and George Culp, visited Gettysburg on Tuesday to learn the sentiment of the people of town concerning the market. The truckers are anxious to have a market regulated by the town and are perfectly willing to continue paying stall rent. They do not take to the idea of being allowed to back up on the Square without any regulation.

The two objections which seem to have found the most strength among town people, the committee were told, were the engaging of goods ahead of time, and the alleged price fixing among the truckers before market opened. Some town residents, say the truckers, want the privilege of engaging their goods several days beforehand, and some market men deny the price fixing charge though they say that the truckers can scarcely be blamed for fixing their prices when grocers do the same thing on eggs, butter and other things.

"What we want", said one grower, "is to please all the people and, if we can have the market, we will endeavor to do that."

HAZING AT HANOVER

Run Down at Night While on his Way Home.

A Hanover High School boy, aged 15, was set upon Monday night by ten members of the school and other boys of larger size for the purpose of "hazing" him at the Walnut street school building. He was on his way home at the time. It is said the lad was thrown on the ground and chastised with sticks. His captors are supposed to have wound up the proceedings by suggesting a trip to Newcomer's spring to throw him in. At this juncture the young fellow desperately resisted, and broke away from the gang. He was followed and caught again when a struggle ensued, which, it is said, resulted in wrenching the boy's back and wrist and caused blood to flow from his hand. Finally he again succeeded in running away and at last reached home. The names of the parties are omitted, pending an investigation by the school authorities.

WEDDING

Edgegrove Couple are Married at Conewago Chapel.

Frank Livelsberger, son of Leo and Agnes Livelsberger, and Miss Mary Rosetta Gallagher, both of Edgegrove, were married in Conewago Chapel by Rev. J. J. Smyth, at 7 o'clock Tuesday morning, at a nuptial high mass. After the ceremony a reception was held at the bride's home.

NO PRAYER MEETING

United Brethren Congregation will Attend Revival Services.

There will be no prayer meeting in the United Brethren church this evening and the congregation will attend the services at St. James Lutheran church.

DIRECTORS TO SAVE EXPENSE

School Board Discuss Proposed Changes to High School Building. Consider Second Story without Any Other Addition.

With the purpose in view of making as small an expenditure as possible and yet meeting the demands for increased space at the High School building, the School Board on Tuesday evening took action looking toward the mere addition of a second story to the present auditorium rather than its enlargement on the ground floor and extension to two stories.

For the extension of the present auditorium, twenty five feet on the southern side and the erection of a second floor, John W. Crowe, who has been retained as architect for the work, estimated that the cost would be \$7815.35. Should the board be willing to have pillars in the auditorium room instead of large bridge trusses which would do away with such obstructions this could be diminished by \$1250. As now contemplated the improvement will cost, it is believed, in the neighborhood of \$3000.

When the present building was erected the architect, Robert A. Stair, of York, made provision for the addition of a second story as now planned and the foundation and walls will take the additional weight without difficulty. The roof may be lifted intact and the work done at a comparatively small cost.

This work will, of course, not provide any more room down-stairs and will create a condition to which the High School faculty objects most seriously. The present enrollment at the school will be increased next fall by about thirty, the graduating class numbering twenty and the incoming class from the grammar grades fifty. The capacity of the auditorium is now taxed and the increase will mean that the school will not be able to gather as one body at any time. A smaller auditorium will be planned for the second floor and it is proposed that the Senior class use this.

While the gathering of all four classes daily for opening exercises and the general work of the school is regarded by the board as most desirable they do not think it of sufficient value to require the outlay necessary to allow it to continue.

There is, however, one remedy for this, for the present at least, and that is the extension eastward of the present auditorium. The board owns a small amount of land immediately in the rear of the building, the minimum width at any one point being, it is thought, about eight feet. By pushing back the present rear wall for that distance, twenty seven more desks could be accommodated, which, it is believed, would meet requirements for several more years, after which the up-stairs assembly room would have to be put into use. Even if this eight foot extension is made the addition of a second story is regarded as a necessity and Mr. Crowe will submit figures on the addition both with and without the eight foot extension.

It is expected that definite action on one or other of the various plans outlined will be taken in the near future.

FOR ICE PLANT

Spring Grove will have a New Industry.

The Spring Grove Ice and Ice Cream Manufacturing company was organized on Tuesday night with a capitalization of \$5,000. Its officers are: president, Charles F. Emig; vice president, W. A. Stambaugh; secretary and treasurer, A. D. Swartz; directors, R. B. Bortner, P. R. Emig, A. H. Swartz, A. Stambaugh, and C. H. Stover. A charter will be applied for and an order for 10-ton ice machine has been placed with the York Manufacturing Company. The new plant will operate in the building formerly occupied by the Spring Grove Garage and Supply company and will begin operations May 1.

FUNERAL NOTICE

The funeral of Mrs. Martha Hamilton who died at her home in Reading on Monday will be held in the Presbyterian church in Gettysburg Thursday afternoon immediately after the arrival of the 1:45 train. Interment in Lower Marsh Creek Cemetery.

CLEAN RAGS: will pay highest cash prices for clean rags, free from hooks and buttons. Bring your supply to Times Office.—advertisement 1

SUCCESS GREET REVIVAL EFFORT

Twenty Four Decisions Announced as Result of First Three Days of Revival in St. James Lutheran Church Tuesday's Sermon.

Twenty four decisions have resulted from the evangelistic services in St. James church—twelve in addition to those announced on Monday night. Of those who have been reached, four came to a decision at the jail service on Tuesday afternoon. On Thursday afternoon at 4:30 there will be a meeting at the County Home.

The church was again filled at the Tuesday evening service.

The text was "What shall I do then with Jesus which is called Christ?" Matthew: 27:22. The sermon is a nutshell was:

"Strong men are always a problem to those in authority. Jeff Davis was, Napoleon was, Aguirre was, but when these men were disposed of they were disposed of finally. That is not so of Jesus. Three days after Pilate gave Jesus over to the Jews He came back from the grave and was a bigger problem than ever.

"He has been a problem to every one who has ever heard of Him. He is a problem to you now. Every one of you is sitting in Pilate's chair to-night and Christ is before you awaiting your decision. You can't evade the answer. Pilate tried to do it by washing his hands and saying that he was innocent of Christ's blood, but Pilate couldn't have washed his guilt away if he would have bathed in every stream, river, pool, lake and ocean on earth.

"People to-day try to evade a decision for Christ by washing their hands in the activities of a lodge, a civic club, a parent teachers' association, a play ground association, etc. but, however good they may be in themselves, they do not excuse us from definite action concerning Christ.

"The question isn't settled when you say 'no' to Jesus. He won't let you go. He will follow you. You can shake people but you can't shake Christ Jesus. You may curse Him, you may love Him, you may be indifferent to Him; He will still be right by your side.

"He said 'Lo, I am with you always, even unto the end of the world'. That is very comforting when you are right with Christ but very terrible when you are not. He is right with you when you are leaning over the bar, when you are playing cards, when you are dancing.

"We must decide and if we refuse to decide for Him we thereby decide against Him for He said 'He that is not for me is against me'."

A card from a Williamsporter to a Gettysburgian says, "I suppose you have heard the Millers sing. You can't afford to miss one song. If you do, you miss a treat. If they can't sing the gospel, no one can. Mr. McEwen, the leader of the Biederwolf singing, said that when he was in Williamsport at the State Sunday School Convention he did one thing and that was fall in love with two people, a man and a woman, Mr. and Mrs. Miller. Rev. Mr. Miller is pastor of the Methodist church of Montoursville. Mr. McEwen has invited them to tour Scotland with him this Spring in evangelistic work."

Mr. and Mrs. Miller will sing at this evening's service.

MISS JENNIE ADAMS

Miss Adams Died at her Home in York on Tuesday.

Miss Jennie Adams, of York, thirty eight years old, died Tuesday evening about 8:45 o'clock. Death was caused by tuberculosis, after a sickness of about a year.

She is survived by her father, John Adams, of Gettysburg; three brothers, James, of Gettysburg; Harry, Titusville, and Ray, of York, and one sister, Mrs. Edith Prince, of Carlisle.

WOMAN'S College Hospital, 2121 N. College Ave., Philadelphia, training school for nurses. Three-year course; instruction in medicine, surgery, gynecology, obstetrics, massage, dietetics. MADAME DE SYLVA CONCERT PLEASD

Noted Singer Greeted by Large and Appreciative Audience at Brua Chapel on Tuesday Evening. Another Similar Concert Later.

Madame de Sylva, the Viennese contralto, sang at Brua Chapel Tuesday evening to a large audience. Students and faculty of College and Seminary were particularly well represented and their appreciation of the operatic program was expressed in no uncertain terms. The College is particularly fortunate in having been able, through the generosity of the "Friends of Music", to offer such a treat to students and townspeople. Another recital is promised for this season, but neither soloist nor date can at this time be announced.

The rare quality of the great singer's voice, which she handles with consummate skill, together with its great range, were brought out by an interesting and varied program. If one were to choose from such an offering those numbers which apparently gave the greatest pleasure, perhaps Schubert's "Erl Koenig" should have first place. Madame de Sylva was however equally at home in Strauss's flowery "Voci di Primavera", in the fascinating Carmen dance song, "Seguidilla," and in the pathetic Tannhauser Prayer.

The artist sang only two English numbers—an old English song, "Genevieve", and "The Last Rose of Summer". In both of these favorites her rich tones and faultless enunciation captivated the audience.

The accompaniments of Mr. Harry W. Brown were particularly sympathetic and perfect in technique. His part in the Erl Koenig was masterful. Mr. Brown possesses interpretative genius and modesty, each in no small degree.

Miss Minnie Lohr, our Gettysburg pianist, played the Rachmaninoff C. Sharp Prelude and the new "Herald of Spring", by Friml. She was both times enthusiastically recalled and responded with a Moskowski Etude and later with Schumann's "Warum". Few perhaps of the audience had realized that we had a pianist of Miss Lohr's ability in town. Her part in the program was artistically rendered and added much to the charm of the evening's entertainment.

The following was the program:—

PART I

Ach Mein Sohn—Le Profete, Meyerbeer; Habanera—Carmen, Bizet; Seguidilla—Carmen, Bizet; Prelude in C Sharp Minor, Rachmaninoff; Prison Scene—Le Profete, Meyerbeer.

PART II

Prayer—Tannhauser, Wagner; O Mio Fernando—La Favorita, Donizetti; Still Wie Die Nacht, Bohm; The Erl-King, Schubert; Herald of Spring, Friml, Miss Lohr; Voci di Primavera, Strauss.

EXAMINATION

Vacancy on Aspers Rural Route to be Filled.

An examination for the position of rural letter carrier in Adams County will be held in this place on Saturday, March 14.

Application blanks must be filed with the U. S. Civil Service Commission at Washington, D. C., which blanks may be obtained from the Civil Service Commission, the postmaster at Aspers, or local secretary, George P. Black at the Gettysburg post office.

This examination is being held in order to fill a vacancy at Aspers, caused by the death of James A. McBeth, but is open for all residents of the county.

LINCOLN MEMORIAL

Will Break Ground for Highway Substitution this Week.

Ground for the Lincoln memorial, to be erected in the shadow of the Washington Monument, will be broken next Thursday, February 12th. It will be a magnificent building, the Lincoln Memorial Commission having decided on this rather than a Memorial Highway to Gettysburg.

McSHERRYSTOWN

McSherrystown—Frank Horwedel, of Worcester, Mass., is visiting his mother, Mrs. Mary Horwedel. Born to Mr. and Mrs. L. E. Topper, a daughter.

The stock sale of the Eckenrode Brothers, near Johns' dam, on the old Daniel Smith farm, Saturday, was well attended and high prices were realized for everything sold.

William Shetter and family have moved from Conewago Mills to the Louisa Smith property.

The banns of matrimony were published for the first time between Fred Smith, son of Mr. and Mrs. Charles F. Smith, and Miss Regina Kitchener, daughter of Charles Kitchener, in St. Mary's church, Sunday morning.

A number of McSherrystown enthusiasts made a trip to York in automobiles Monday night to attend the basketball game between St. Mary's A. A. five, of that place, and the Keystone A. C., of York. The Yorkers trounced the McSherrystown quintet by the score of 44 to 24 in a game played on the Tramerick floor in the Peterman building. It was the first game that the McSherrystown boys had played off of their home floor this season and they were slow in getting started in the first period, the Keystone team running up a large score. In the second half the McSherrystown team came back strong and outscored the locals. Garland and Glatfelter excelled for the Keystone five, while Wiernman played the best game for the McSherrystown team.

HENRY C. BRENNEMAN

York Attorney Dies after an Illness of Several Years.

Henry C. Brenneman, prominent York lawyer, politician, lodgeman and former superintendent of the York county schools died this morning at 1:20 o'clock at his residence in York. He was fifty-six years old. Mr. Brenneman had been in declining health for a number of years but engaged in active practice of law until about three weeks ago when he returned to his home in a weakened condition and collapsed. Since that time he has been confined to the house.

In 1887 he was elected superintendent of the York county schools and was re-elected in 1890.

Towards the close of his second term as county superintendent he decided to take up the profession of law. He was registered as a law student in the office of N. Sargent Ross, at present associate law judge of the York county courts. He was admitted to practice in August 1896, and shortly thereafter a partnership was formed with his former preceptor, which resulted in the legal firm of Ross and Brenneman.

COMING EVENTS

Happenings in Gettysburg Scheduled for Coming Weeks.

Feb. 12, 13—County School Directors' Convention. Court House.

QUAKE ROCKS WIDE TERRITORY

Shocks Severe in New York State and Canada.

NO SERIOUS DAMAGE DONE

In Ottawa People Ran From Homes
Panic-Stricken, While Buildings
Rocked and Furniture Overturned.

New York, Feb. 11.—Points as far north as Montreal and as far south as Philadelphia felt distinct earthquake shocks of varying intensity yesterday afternoon.

Indications were that the entire Northeastern section of the United States was in the zone of tremors. At no point included in the first reports was serious damage done.

In New York state the tremors were recorded in New York city, Albany, Elmira, Rome, Syracuse and other points. In Canada shocks were felt at Montreal, Ottawa, Toronto, Prescott, Brockville and other places.

One life was lost as a result of the earthquake at Binghamton, N. Y. The tremors caused a cave-in of a trench four feet deep in the basement of the Walley building, and Rocco Parso, a laborer, was killed.

The shocks seemed severest in Canada. A man was hurt in Montreal by being thrown from a wagon when his horse was frightened by bricks and boards falling from the top of a building.

In Verdune, a suburb of Montreal, hundreds of persons rushed from their homes in panic. The mayor of Verdune said that it sounded as if "a live-ton truck was being pulled through the streets at high speed."

In the parliament building at Ottawa pictures were shaken from the walls, tables and desks were overturned, and buildings rocked upon their foundations. Members of parliament ran bareheaded into the streets. Telephone poles were shaken down on the outskirts of the city and telephone communication with some districts was interrupted. Residents of the outskirts were panic-stricken and fled from their homes into the open fields.

The shock throughout the St. Lawrence valley was the severest recorded in the memory of the oldest inhabitants, but no damage was reported there.

Several buildings in Brooklyn, including borough hall and the court house, were shaken. Tenants in New York's highest buildings—the Woolworth and Singer—said that they felt no tremors whatever.

Syracuse was thrown into a panic when there was a distinct trembling of the earth lasting about fifteen seconds. Desks in downtown offices shook. The tremors seemed to go east and west. In the residential districts the shock was quite severe, and in some places plants and dishes were tumbled down.

Some residents of Syracuse state that the shock was so severe that they were terrorized. In the South High School the children were panic-stricken, and at Grant public school several bricks were dislodged and the children were dismissed. No section of the city escaped, but the large business blocks suffered the least.

In Ogdensburg buildings shook perceptibly, and some chimneys fell. Telephone girls fled from their switchboards. In some homes furniture was overturned and dishes thrown from the tables. The tremors lasted thirty seconds.

A severe shock was felt in Rome and throughout that section of Oneida county. Dishes shook on their shelves and type in the newspaper offices moved on the galleys.

An earthquake of twenty seconds' duration was recorded on the seismograph at the state geologists' office in Albany. It was noticeable about the capitol, where a number of pictures were shaken from the walls.

NEW ENGLAND ALSO SHAKEN

Reports Show Shocks Were Severe in Some Parts of That Section.

New Haven, Conn., Feb. 11.—The earth tremors were perceptible here. At the weather bureau, on the eighth floor of a downtown building, Observer Tarr noted the tremors. Reports of a like character quickly came from all parts of Connecticut.

The shock was felt at Bridgeport. Dishes were shaken from the shelves and clocks were stopped by the vibration.

The earthquake was felt in Winsted and that part of Connecticut. Brick buildings in Winsted were rocked.

Springfield, Mass., felt the shock, houses being shaken and many people greatly excited. Maple Temple, High and State streets, was rocked.

Pennsylvania Feels Shock.
Scranton, Pa., Feb. 11.—The entire city and upper valley was shaken by what seemed to be an earthquake. So far no damage is reported.

Aimed at Asiatic Ownership.
Columbia, S. C., Feb. 11.—The Stuckey bill to prohibit Asiatic peoples from acquiring land in South Carolina passed to third reading in the state senate without a dissenting vote. A similar bill is pending in the house.

Coxey Candidate For Governor.
Massillon, O., Feb. 11.—"General" J. S. Coxey announced his candidacy for governor of Ohio on the Socialist ticket.

Not His Concern.
Wife (studying vocalism)—"I wish, dear, you'd have double windows put on. I'm afraid my practicing will dis-

WHO IS MORE GUILTY?

Charles Manning and Hazel Herdman, Who Killed His Wife.

Who is more guilty of the murder of Mrs. Charles Manning, of Newark, N. J., her husband or the young woman who actually did the shooting and later ended her own life? This question is being debated. It is pointed out that Miss Herdman, the girl from the right path. Last led the girl from the right path. Last led the girl from the right path. Last led the girl from the right path.

WAR THREAT OPENS PARLIAMENT BATTLE

Unionist Makes Vigorous Attack on Home Rule.

London, Feb. 11.—A fiery threat of civil war in Ireland, if the home rule bill is passed at the session of parliament, which opened, was made by Right Hon. Walter Long, who was chosen by the opposition in the house of commons to lead the fight against home rule.

Long declared that 100,000 Ulstermen were ready to make armed resistance and demanded that the government go to the people before it forced the measure through.

As Long resumed his seat, Premier Asquith arose and addressed the house. The premier promised that the government would take the initiative in putting forward suggestions for a settlement, by agreement, of the Irish difficulty.

The session was opened by a pacific, though somewhat colorless, speech from the throne by King George, and the first battle in a struggle that promises to make history came as soon as the house of commons went into session after a short luncheon interval. The home rule bill is before parliament for the third time, and if it passes it will become a law over the veto of the house of lords.

The house was densely packed and excitement ran high. There was wild cheering by the respective partisans as new members, elected in the recess, were introduced.

Much of the perfunctory procedure was omitted and little interest was manifested in the formal speeches of the mover and seconder of the address in reply to the speech from the throne.

General Reyes Goes Into Exile.
Veracruz, Mex., Feb. 11.—General Rudolfo Reyes, who recently was released from prison by President Huerta and ordered to leave the country, sailed from this port on the steamship Ipiranga. The dictator compelled General Reyes to leave his wife and four children in Mexico as hostages to insure his "good behavior."

Twelve Trichinosis Cases.
Harrisburg, Pa., Feb. 11.—Twelve cases of trichinosis were reported to the state health department. All of them were at Farrell, Mercer county. The disease is the result of eating pork not properly cooked. No cases of this disease had been reported in several years.

To Build 1000-Room Hotel.
Pittsburgh, Pa., Feb. 11.—It became known here that Henry C. Frick sold for approximately \$2,000,000 a part of his valuable real estate holdings in Fifth avenue to James H. Park, Grant McCargo and C. H. Blanchard. They will erect on the site the William Penn hotel, to cost \$3,000,000. The hotel will have 1000 rooms.

Wanted man to move in tenant house and work on fruit farm near Biglerville. Address letter Times Office.—advertisement

NATION'S EYE ON PENNSYLVANIA

Fight Against Penrose Expected to Be Bitter.

ROOSEVELT TO TAKE STUMP

Colonel Will Tour State For Pinchot In Three-Cornered Battle—National Issues to Predominate.

Washington, Feb. 11.—The fight in Pennsylvania against the re-election of Boies Penrose to the United States senate is expected to develop into a campaign of nation-wide interest.

The Underwood tariff act and other policies of the Wilson administration will be kept to the front as issues, and at least three of the candidates for the senate are conspicuous figures in national politics.

The outcome is also expected directly to affect the political future of Colonel Roosevelt, as well as that of Senator Penrose. The fight on Penrose probably will be the most bitter political contest Pennsylvania has witnessed in recent years.

Penrose will be opposed in the primaries as well as at the election. Representative W. D. B. Aimey, of Montrose, has announced that he will be a candidate for the Republican nomination. Penrose expects to have easy sailing in the primaries. If his nomination is assured the line-up for senator will be: Boies Penrose, Republican; Clifford Pinchot, Progressive; A. Mitchell Palmer, Democrat.

The fight against Senator Penrose will take into the campaign a notable list of stump speakers. First and foremost of these orators will be Colonel Roosevelt. The Bull Moose leaders in Pennsylvania say they have arranged with the colonel to spend at least two weeks on the stump speaking for the Progressive ticket.

Colonel Roosevelt will have good reason to invade the Keystone State. Pinchot is his personal friend and was one of the most influential figures in the second Roosevelt administration. Even Roosevelt's enemies concede his strength in the Keystone State. He carried it by more than 50,000 plurality over Wilson, President Taft running a bad third. If he can defeat Penrose he will have again demonstrated his strength with the mass of Republican voters which his friends believe will strikingly emphasize his availability for the Republican nomination for president in 1916.

Senator Penrose has made it clear that he will make his fight for re-election on national issues.

Pennsylvania will elect a full state ticket from governor down to members of the house at Harrisburg and twenty-five state senators as well as a United States senator and thirty-six Democrats of the house at Washington.

There will be a three-cornered fight all the way through, as both the Bull Moose and Democratic parties, as well as the Republicans, will have candidates for every office. Pennsylvania politicians in Washington say the division in the ranks of both Democrats and Republicans is so pronounced that any prediction regarding the outcome of the contest would be no better than a guess.

NOVELIST WEDS SECRETARY

Thomas Hardy Is Quietly Married in a Country Church.

London, Feb. 11.—Thomas Hardy, the famous novelist, was married to his secretary, Miss Florence Dugdale, at Enfield.

Mr. Hardy is seventy-four years old. His first wife was Miss Emma Gifford, niece of Archbishop Gifford. The marriage took place in the parish house of Enfield so as to avoid the presence of crowds of spectators. The bride is the author of a number of tales for children.

As the climax of a long career, Thomas Hardy is to be awarded the Nobel prize for literature for 1914, according to the Pall Mall Gazette, one of the leading English periodicals.

Waiters Inherit \$500,000.

Wilkes-Barre, Pa., Feb. 11.—While working as waiters behind a lunch counter here, John and George Bagdonas, brothers, received a message which told them they had become rich as the heirs of their uncle, Philip Bagdonas, who left a fortune of \$500,000. Soon afterward the brothers quit their jobs and now are making hurried preparations to go to Roumania.

Bill to Enlarge Frankford Arsenal.

Washington, Feb. 11.—Representative Carr, of Pennsylvania, introduced in the house a bill appropriating \$77,000 for improvements at the Frankford arsenal and \$100,000 for the purchase of an additional twenty-five acres to accommodate these improvements. Mr. Carr asks for new shop buildings, new sewerage drains, new river walls and sidewalks.

To Build 1000-Room Hotel.

Pittsburgh, Pa., Feb. 11.—It became known here that Henry C. Frick sold for approximately \$2,000,000 a part of his valuable real estate holdings in Fifth avenue to James H. Park, Grant McCargo and C. H. Blanchard. They will erect on the site the William Penn hotel, to cost \$3,000,000. The hotel will have 1000 rooms.

Wanted man to move in tenant house and work on fruit farm near Biglerville. Address letter Times Office.—advertisement

CUBS OUST EVERS

O'Day Appointed Manager of the Chicago Nationals.
Chicago, Feb. 11.—Johnny Evers will not be manager of the Chicago National league club this year, according to statements given out in President Murphy's office here.

It was said that Evers will be succeeded by Henry O'Day, umpire and former manager of the Cincinnati club. The statement gave no reason for the change in managers, other than saying that O'Day had made a good showing with the Cincinnati club in 1912.

Differences between Murphy and Evers have existed ever since the middle of last season, and at one time the story was printed that both Evers and Joe Tinker, then manager of the Cincinnati, were destined to lose their jobs.

Tinker was removed from the Cincinnati position early this winter, and this news bears out the remainder of the story.

MAN IN NIGHTMARE TRIES TO KILL TWO

Was Frenzied by Fear and Unrequited Love.

Philadelphia, Feb. 11.—A dream, caused, the police say, by the haunting of a secret society, and possibly the partial result of a love unrequited, led Vojania Schino, an Italian, of 1539 South Mole street, to attempt to murder his two-months-old niece and his uncle.

He struck the baby with a club, imagining the child was a rag doll, and when his uncle tried to save the baby he stabbed him six times with a stiletto. Schino then threw the child into the street and fought desperately with a detail of police.

He was clubbed into submission with blackjacks, but he later attempted to kill himself in his cell by beating his head against the bars.

The prisoner was held under \$1000 bail for a further hearing on Feb. 17. The police say the child and his uncle were not seriously injured and would probably be out of the hospital in a week.

The police believe Schino may be insane, though Dr. Morrison, a police surgeon who examined him, does not think this the case.

Schino, in telling the police that his condition was partly due to unrequited love, said a girl to whom he was engaged jilted him at Christmas. Schino consulted a West Philadelphia fortune teller recently and asked her how he could win back the girl.

The father of the baby, who was injured was at the soothsayer's house when Schino went on the rampage. He wanted to find out if Schino was insane.

The baby, Toskie Schino, and Schino's uncle, Antonio Rossio, forty-nine years old, are in St. Agnes' hospital. The infant was cut about the body by the sharp edge of the club. Rossio was stabbed in the back, face, chest, head and abdomen.

WOMAN DIVES TO DEATH

She Poised as For Swimming and Plunged Fifteen Stories.

Kansas City, Feb. 11.—A fashionably dressed woman, about thirty years old, leaped from the roof of the R. A. Long building, a fifteen-story structure in the downtown retail district, here and was dashed to death on the cobblestones of the alley in the rear.

Persons in an office of a neighboring building saw the woman climb to the parapet, poised a moment, clasp her hands and dive headfirst, as she might have plunged into a swimming pool.

The initials "E. S." embroidered on her handkerchief furnished the only immediate clue to her identity.

Jail For Bogus Statesman.

Washington, Feb. 11.—Impersonation of congressmen or other officers of the United States would be made a crime by a senate bill passed. Any persons professing to have improper influence with congressmen also will come within its provisions. The bill was one result of David Lamar's sensational testimony before the lobby committee of having impersonated congressmen in telephone talks with Wall street financiers.

PERSONAL NOTES AND BRIEF ITEMS

Paragraphs of News Telling of the Happenings in and about Town People Visiting Here and Those Sojourning Elsewhere.

Miss Margaret Coover and two guests, Miss Marian Kistler and Miss Gladys McCauley have returned to Wilson College after a visit of several days at the home of Dr. and Mrs. M. Coover on Seminary Ridge.

Dr. Jacob A. Clutz was a business visitor in Harrisburg on Tuesday.

J. H. Kadle is a business visitor in Hanover to-day.

Walter Fuhrman, of Railroad street, is spending some time in Harrisburg and Middletown.

Mrs. S. S. Neely returned home on Tuesday evening from a visit of several weeks with relatives in Pittsburgh.

Wm. Arch McClean and J. G. Slonaker returned home on Tuesday evening from a business trip to Washington.

HENRY CLAY BARNABEE

Master of Mirth in Music

America's Master of Mirth is the loving title given to Henry Clay Barnabee, known in America and Europe as one of the most active singers of opera roles of his time. He was the original Sheriff of Nottingham in "Robin Hood", and played Sir Joseph Porter in "Pinafore" the first time it was presented in America. He was for over sixty years known as the only man who could sing "The Cork Leg" and the ballad "O Loving Heart, Trust On", written for him by Gottschalk, the famous composer. Shortly after the Civil War Mr. Barnabee began playing with the Boston Museum Company and later began his work as an entertainer, making a circuit of minor towns and cities, combining music and declamations. Mr. Barnabee was a leading spirit of the old Boston Ideal Opera Company, which continued for many years as one of the most popular musical organizations ever known to American opera lovers. In his eightieth year he completed a remarkable book of reminiscences entitled "My Wanderings", which met with an enormous sale. In later life he retained his splendid quality of voice, still singing many of the songs which he made famous.

"O Loving Heart, Trust On", and others of the Barnabee Songs are to be found in that beautiful volume, "Heart Songs" now being distributed by this paper. Look elsewhere for the Coupon giving the terms to our readers.

Condolence.

Mrs. Hen was in tears. One of her little ones had been sacrificed to make a repast for a visiting clergyman. "Cheer up, madam," said the rooster, comfortably. "You should rejoice that your son is entering the ministry. He was poorly qualified for a lay member, anyhow."—Philadelphia Ledger.

Beauty in Mexico.

The beauty of the Mexican women consists in superb black eyes, fine and very abundant dark hair, lovely arms and extraordinarily beautiful hands and feet. The Indian women sometimes add to these points of beauty a perfect figure, dark but glowing complexion and teeth like snow.

Horse's Endurance.

To test the staying power of a thoroughbred horse a New Jersey man rode an animal from New York to Chicago. He covered the first 700 miles in less than 12 days of actual riding. This horse once made the distance of 78 miles in 24 hours, carrying a rider over the mountains between Johnstown, Pa., and Pittsburgh.

Handy Boxes.

Every living room or library ought to have somewhere in it a handy box or drawer. In it should be wrapping paper, string, stickers, clips, mullage or paste, tags and the thousand and one little things that one is likely to want frequently and is inconvenienced by not having. If they are handy in a known place time is saved over again.

Supreme Court All-Powerful.

The Supreme court of the United States is the most remarkable political institution of the world. Its judgment rendered upon cases brought before them becomes the supreme law of the land.

GETTING THE BEST OF FATHER

Old Man Falls Victim to Wiles of His Grandson.

You know pa wouldn't consent to Del's marriage with Jim, wouldn't allow the wedding at the house or allow either Del or Jim to come here afterward. This was because Jim had been wild and hadn't settled down.

The years went by, and pa instead of softening appeared to harden, though Jim made Del a splendid husband and grew rich. They had one child, a boy, the prettiest little chap you ever saw. One day an artist saw him in his bath and was so struck with his little form that he asked leave to copy him into a picture he was painting. The picture was a success and brought the artist a fine reputation, all on account, everybody said, of the little figure in the corner. One day Del said to me, "Ma, I'm going to send pa a present."

"I'm afraid, my dear, he'll send it right back to you."

"Maybe he will, and maybe he won't. Anyway, I'm going to try it. I'm going to put it in the dining room so that he'll see it when he comes down the first thing in the morning."

"How are you going to send it?"

"Jim and I are going to get up early and take it round. You are to let us in. We'll place it right where pa will see it the first thing when he comes into the breakfast room."

I didn't believe it would do any good, but I told Del I would help her in any way I could, so it was all arranged that they should bring their gift the next Sunday morning. On that day we breakfasted at 9 o'clock, and pa does not have to go downtown to business. When Sunday came the sun was shining bright and beautiful, the birds were singing in the yard, and there was a delicious freshness in the air. I was thankful, thinking that if anything could put pa in a good humor it would be this beautiful morning. A little before 9 Jim and Del drove up to the side gate, which was hidden from the house by trees, though that wasn't necessary, as pa was shut up in his shaving room, where he couldn't see anything, and Jim carried an oblong box about three feet in length up to the side entrance. I let them in, and they went to the dining room, while I went upstairs to keep an eye on pa. He had finished shaving and was sitting by the front window looking out, but instead of being happy like the bright morning seemed to make him all the more melancholy.

"What a pleasant day," I said, "for a family party to go for a drive."

"There's no family party except you and me," he said.

I knew that he was pining for Del, but I didn't say anything more for fear of making him ugly. I saw by the clock that it was five minutes to 9, and I went to the banister and coughed to give Jim and Del warning, then told pa that breakfast was ready. He got up with a sigh, and we went downstairs together.

We both stood mute looking at what we saw in the bay window at the end of the dining room. The marble bust that always stood on the pedestal had been removed, and in its stead was the statue of a little boy about five years old. It was of white marble—that is, so far as we could judge—and held out a pair of little arms to us.

"Great guns!" pa exclaimed.

"Little darling!" said I. "What a pity it isn't alive!"

"How do, grandpa?" cried the statue, and, tearing off its white face, it displayed the rosy features of Del's little Jim. Jumping off the pedestal, all in his white tights, he ran up to his grandpa, who bent down and took him in his arms.

I never saw pa so overcome in my life. He hugged the boy so tight that I thought he would crush him. Then Del came from the pantry and put her arms around them both. Del was laughing and crying, and pa was trying to keep from doing both. Then he put little Jim down, and without noticing that his clothes were covered with the white powder that had made the boy's tights look like marble he folded Del in his arms.

Jim—big Jim, I mean—seeing through a crack in the pantry door that the plan had been a success, came into the room, and pa put out his hand.

That was the happiest breakfast party any of us ever sat down to. I had taken pains to have a nice breakfast, though I didn't believe Del's present to her father would break through his crustiness, but hoped that it would and we would all take our Sunday morning meal together. After the breakfast we sat in the library and talked while pa and Jim smoked.

"Ma," said pa to me, "didn't you say something about a family party going for a drive? I reckon we'll have out the horses."

Pa and Jim went out to the stable while Del and I got up a lunch. Then we started for the country. There was room for Jim and Del on the back seat, while pa had little Jim with him in front. Jimmie hadn't ever ridden behind horses before and was wild with delight, talking to his grandpa and begging him to let him drive till pa consented.

Who got up the statue? Why, the artist who used little Jim for a model. After the reputation and money he made out of his picture he couldn't do enough for Jim and Del and exercised all his skill on the boy's makeup and in posing him.

Truth of the Matter.

Dea ain't no lion in de way at all! It's dese some ole sin you tried ter hide dat's waitin' fer you whar de road turns.—Atlanta Constitution.

THE SWINEHERD.

Soft coal or coal cinders are relished by pigs and hogs because of the mineral matter they contain.

A rigid system of selection of brood sows should be practiced by all swine breeders.

If hogs are crowded in cold weather in a cold pen they will pile up and smother the weaker ones.

Place feeding platforms at some distance from the pens. In stormy weather feed in the pens.

The hog is pretty nearly all a bundle of money, and he should not be neglected in a manner.

Fall pigs or any other pigs, for that matter, should be kept off the manure pile during the winter.

SILAGE FOR BEEF MEN.

Excellent For Fattening and For Feeding Stock Cattle.

For a period of four years tests have been carried on with steers at the Wisconsin College of Agriculture to determine the value of silage as a feed for the fattening steer when fed alone with a suitable grain ration or in connection with either good alfalfa or clover hay roughages fed with a grain ration. In every instance it was found that silage lowered the cost of grains when introduced into the ration, and when fed as the sole roughage (although gains were not so large as when clover or alfalfa hay was added to the ration) the gains were made the most cheaply.

It is unwise for the farmer to feel that because silage is a good feed it can be made the sole feed for stock, says the Iowa Homestead. By nature it is high in water content, low in protein and high in carbohydrate materials. To be properly balanced the ration should contain some feeds that are low in water content and carbohydrate material and high in protein. For fattening purposes a good day's ration for a 1,000 pound steer would consist of from fifteen to twenty pounds of silage, five or six pounds of alfalfa or clover hay, fifteen to eighteen pounds of broken ear corn and two or three pounds of cottonseed meal.

Not only is silage useful to the beef man for fattening purposes, but it is useful for stocking cattle over the winter, and a farm test made upon a Wisconsin farm under the supervision of the College of Agriculture showed an average daily gain of over a pound per day, and the steers came out in the spring in good condition to go on grass. These steers were fed about twenty pounds of silage daily, together with what timothy they would consume. When stocking over young cattle on silage it would be preferred to have clover hay or alfalfa hay, as it is higher in protein than timothy hay.

Wrappings of the Mummies.

The cloth woven by the ancient Egyptians was so durable that though it has been used for thousands of years as wrappings for the mummies the Arabs of today can wear it. It is all of linen, the ancient Egyptians considering wool unclean.

AFTERNOON GOWNS OF VELVET OR CHIFFON SUITABLE FOR CONCERT OR LUNCHEON

It is promised for some time to come that the loose, un-fitted lines which mark many of the frocks and suits of the moment will continue modish. In soft materials they are becoming to nearly every one, as they fall and drape the figure rather than add to its size, as so many people think.

In 8077 is illustrated a gown of chiffon over a supple satin. The color is bronze, and the draped sash is of coral velvet.

This frock may be copied in size 36

To obtain either pattern illustrated fill out this coupon and enclose 15 cents in stamps or coin. Be sure to state number of pattern and size, measuring over the fullest part of the bust. Address Pattern Department, care of this paper.

Spick and Span.

There is no better agency of renovation than fresh paint. Not only is it efficacious in itself, but it is easy to apply, says the Philadelphia Ledger. There are probably in every house many things that would be greatly improved by a coat of paint. It may be a built-in bookcase or a chair or cupboard. The handy man or the handy woman can always do a deal of renovating very inexpensively with the paint brush, and keep things in the spick and span condition so essential to an orderly, comfortable home.

Where Many Make Mistake.

With a gentle heart and sound reasoning powers a man comes to admire in others the qualities which he himself lacks, but earlier wanted so much that he considered any one possessing them more or less of an enemy. It is only men who have done nothing with a single talent, or possibly a confusing group of talents, who remain to the end of life bitter toward those who have made good, having but one or two.

Queer English Duty.

Americans will be interested to know that from 1660 it has been customary to take a duty as one of the hereditary customs of the crown. In 1660 there was a duty of eight pence a gallon on all the tea liquor sold in all coffee houses—a great inconvenience to tea drinkers, because it was surveyed only twice a day by the excise officers, and so could only be brewed twice a day.—London Mail.

PUBLIC SALE OF VALUABLE HOTEL BUSINESS AND PROPERTY

Notice is hereby given that the undersigned, by virtue of an order of the Orphans Court of Adams County, Pennsylvania, will offer at public sale on SATURDAY, FEBRUARY 28th 1914, the following valuable business and property as a whole:

(a) The Leasehold interest in the New Eagle Hotel premises at Gettysburg, Pa., which lease runs until the 1st day of November 1923.

(b) A leasehold interest in the furniture and equipment now used in said business.

(c) A large stock of wines, liquors, cigars, food stuff and sundry supplies.

The hotel business and property offered constitute the most valuable hotel business in Adams County, Pa., and its sale is made necessary by reason of the death of the former lessee thereof. This Hotel is equipped with all modern improvements and has accommodations for 100 guests.

The sale will be held on the premises at 2 o'clock P. M.

The business will be sold as a going business and the liquor license will be transferred to the purchaser. The terms of sale will be 10 per cent. in cash when the property is struck down; 40 per cent. when the sale is confirmed nisi by the Court and the balance of 50 per cent. on or about the 1st day of April 1914, when possession will be delivered. Other conditions will be made known at time of sale, or may be ascertained in advance upon inquiry made to the undersigned.

WILLIAM HERSH.

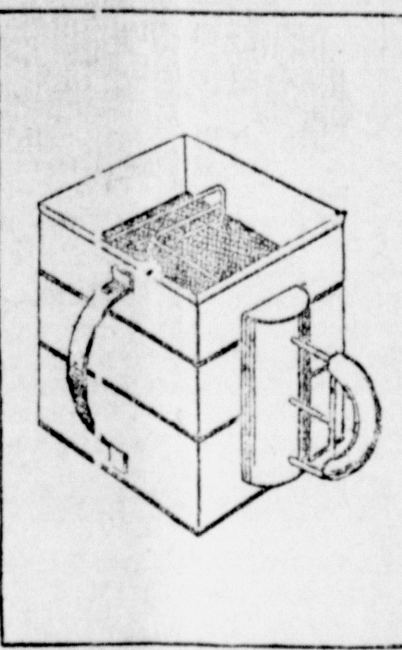

Administrator of the Estate of R. M. Ham, decd.

Gettysburg, Pa.

FEBRUARY 11th 1914.

HINTS FOR THE BUSY HOUSEWIFE

Sieve That Mixes and Sifts Flour at One Operation.

A sieve that mixes flour thoroughly at the same time that it sifts it has been designed by a Missouri man. The sieve is a rectangular casing, with an open upper end, and is divided into three compartments, separated by screen partitions. The handle by which it is held is on one side, and on the adjacent side is a second handle, operating three horizontal bars, one of which runs through each compartment. On the ends of these bars are rakes, which serve to agitate the flour when the handle is pulled in and out. The upper and lower bars are longer than the intermediate one, so that each rake moves across only half the surface of the screen, and the mixing is given a continuous backward and forward motion.

Cabbage in Casserole.

Cut a firm white cabbage into quarters and boil it. After fifteen minutes' cooking pour off the water. Cover with cold water, then drain, add fresh water and return to the stove. Repeat this process of blanching until the cabbage is tender. When tender drain it again and cut it into shreds or tear it into as small pieces as possible. Cover it with a cream sauce prepared in the usual way. Put it into a casserole, spread breadcrumbs and melted butter over the top. Add a dash of grated nutmeg and bake until well cooked and with a brown crust. This is very nice with pressed cold corn beef or with broiled ham.

Stuffed Rolls.

Take a roll for each person and remove every particle of the inside. A cupful of cold minced poultry or veal should be in readiness, with which may be mixed a trifle of chopped ham to give higher seasoning. After melting a little butter in a stewpan stir in a dessertspoonful of flour and add a gill of milk or cream with the minced meat. Stir well until it is very hot. Fill the rolls, close them and place them in a warm oven for a couple of minutes, then garnish with parsley and serve.

Broiled Veal Cutlets.

Veal cutlets when properly broiled are very much better than when fried in the usual manner. Season well two pounds of the meat and half an hour before serving broil quickly and thoroughly. A pan with a tightly fitted cover should be in readiness in the oven, into which a cupful of hot water and a piece of butter about the size of an egg should be poured. Lay the cutlets in this and cover it up closely so that they will remain very hot until carried to the table.

Water Cake.

Water cake does not sound particularly appetizing, but it is in reality a very acceptable cake, though it takes neither eggs nor milk and very little butter. One cupful of sugar, one cupful of slightly warm water, two cupfuls of sifted flour, one-half cupful of butter, three teaspoonfuls of baking powder and a pinch of salt. Bake in shallow tins and cover with any kind of icing, then cut into squares.

Removing Egg Stains.

Table linen which has been stained with egg should never be placed in boiling water, as it has the effect of "setting" the stain and making it almost permanent. The best method is to soak the cloth in cold water, which will make it perfectly easy to remove the stain before sending it to the wash.

Spice Cake.

One cupful of molasses, one cupful of sugar, two-thirds of a cupful of butter, one cupful of sour milk, two eggs, one teaspoonful of soda, same of nutmeg and cloves, one and one-half teaspoonfuls of cinnamon, three cupfuls of flour. This cake will keep a long time.

Ironing Flannels.

Before ironing flannels take care to have them thoroughly dry, then wet a piece of coarse calico cloth, put it over the flannel and iron till the garment is dry. It is said that these directions are followed the flannel underwear may be kept like new.

Chocolate Cream Filling.

Half pound of sweet vanilla chocolate, grated; one cupful cupful of powdered sugar, yolks of two eggs, one gill of boiling milk. Stir all together till it makes a cream. To be spread between layers of cake.

Not Worth It.

It costs more than \$2,000,000 a week to run the city of New York. We will willingly accept the controller's figures for it, but hanged if we believe it is worth the money.—Manchester Union.

PUBLIC SALE

SATURDAY, FEB. 21, 1914

The undersigned will sell at public sale at his residence in Mt. Joy township, Adams County, Pa., on the Young farm 1 mile from Two Taverns and 2 miles from Ronneville, near the Low Dutch road the following personal property to wit:

1 pair of bay mules 4 years old 16 hands high, well mated and well broken, one a good leader work wherever hitched fearless of all road objects.

5 head of dehorned cattle consisting of one coming fresh by time of sale, 2 in March, 1 in May and 1 in June, these cows are all good milkers and 2nd and 3rd calves.

18 head of hogs, 3 brood sows, 2 o have pigs by time of sale, 1 later, 15 shoats ranging in weight from 40 to 80 pounds.

Sale to begin at 12 M. on said day when terms will be made known by M. P. BAKER.

Also at the same time and place I will sell the following articles:

2 head of horses, both leaders fearless of road objects.

2 milk cows, one fresh in December, the other will be fresh by day of sale, 1 German belt heifer 10 months old, 1 Deering 6 foot binder in good running order 1 McCormick mower 15-tooth harrow, corn planter, 1 hand roller, 1 fanning mill, hay rope, fork and pulley, 1 No. 10 Mountville plow, triple, double and single tree, jockey sticks, 1 wagon suitable for 2 horses and 1 runabout buggy, sleigh and bells, good top buggy, wagon, 1 lay carriage 14 ft. long, grain drill, Krons corn worker, 2 sets crupper gears and collars, 2 new Yankee bridles, set of harness, household and kitchen furniture, milk cupboard, copper kettle, ten-plate stove, dough tray and flour chest.

EDMUND F. SNYDER.

PUBLIC SALE

TUESDAY, FEBRUARY 24, 1914

The undersigned will sell at Public sale at his residence in Mt. Pleasant township at what was formerly known as Sugartown, along the Hanover road, 1 1/2 miles east of Golden's Station, the following:

FOUR HEAD OF HORSES, one pair of black horses coming 3 and 8 years old, well mated, both good drivers, the one is a good lead horse, one black pacer horse, coming 6 years old, will work wherever hitched, good driver. These horses are all gentle, any woman can drive them. One nice Belgian horse coming 2 years old. He works and drives nicely. He is gentle and will make a heavy draft horse.

SIX HEAD OF GOOD DEBORNED MILK COWS: two will be fresh in March, FIFTY HEAD OF HOGS: will weigh from 35 to 125 pounds. Two fine young sows, one of them has 9 pigs by her side. A good young male hog fit for service; ONE HUNDRED AND FIFTY LAYING HENS: will be sold by the pound. Potatoes by the bushel. Other articles not mentioned. Sale to begin at 12 o'clock. A credit of 12 months will be given purchasers giving their notes with approved security. Four per cent off for cash. Further terms will be made known on day of sale by the undersigned.

IRA G. HERMAN

Basehor, Auct.

Tawney, Clerk.

Also at the same time and place the undersigned will sell his bay driving horse, 8 years old and a number one driver. He has plenty of speed and is a good saddle. He will pace or trot and works equally well double or single. He is fearless of all road objects and would be suitable for delivery men or a doctor. Black horse 12 years old, works single or double, good single line leader and a good general farm horse. Two stock bulls. One Chester White brood sow, will have second litter of pigs by time of sale.

W. S. RITTASE

PUBLIC SALE

WEDNESDAY, MARCH 11, 1914

The undersigned intending to quit farming, will offer at public sale in the N. D. Snyder property known as the Samuel Miller place, in Menallen Township, close to Bendersville station the following personal property:

2 horses: 1 a bay horse coming 15 years old, 1 gray mare coming 17 years old, both work anywhere hitched.

7 head of dehorned cattle: No. 1 part Guernsey, will have her second calf by time of sale; No. 2, black cow had her fourth calf latter part of January; No. 3, large Holstein carrying fourth calf, comes in November; No. 4, light roan carrying third calf, comes in April; No. 5, blue roan will have 7th calf in July, hard to beat for size and milk; No. 6, red Durham carrying 7th calf, comes in August; No. 7, Holstein heifer, 14 months old, hard to beat comes in September. These are all good cows with a record for big milkers, which I will prove to you on day of sale.

Hogs: 5 shoats weighing from 60 to 70 pounds apiece, one full Chester White sow will have her second litter of pigs by time of sale. Chickens: 50 Barred Plymouth Rock hens.

Farming implements and vehicles: 1 two horse western wagon, good and solid, 1 one horse wagon, 1 light covered spring wagon, just newly done over a year ago, 1 good falling top buggy, 1 road cart, 1 heavy one-horse spring wagon, 1 good sleigh with box and basket, 1 good Deering mower, five foot cut, good hay rake for one horse only, Crouse sully plow, 1 good fench and Dromgold Daisy corn planter, 1 good set hay ladders, 16 ft. long, 1 sixteen tooth Perry harrow, 1 Spider plow, potato cover, shovel plow, double shovel plow, 1 bull tongue plow for breaking new land, 1 long Syracuse plow No. 96, one good hinge harpoon hay fork, ropes and pulleys, only used two seasons, 3 good ladders 14-21-23 feet long, meat vessel, 2 feed chests, 1 spike bar, row, double trees, single trees, jockey stick, grain cradle, wheel barrow, 3 sets butt traces, log chains, breast chains, cow chains, crowbar, 14 pound steel sledge, knapping hammer, mowing scythe, straw knife, pick, mattock, forks, 400 bu. of yellow ear corn, 2 grindstones, iron kettle and ring, 2 bureaus, washing machine, sewing machine, spinning wheel, 3 rocking chairs, 1/2 doz. hard bottom chairs, vinegar barrels and vinegar, potatoes by the bushel, 3 dried leaf tables, kraut knife, 50 pound milk can, wash tub, 3 sets Yankee harness, 2 sets buggy harness, check lines, 1 set single lines, lead rein and line riding saddle, halters, ropes and straps, 1 new buggy fly net, and many other articles not herein mentioned.

Sale to begin at 12:00 o'clock. Ten months credit, 4 per cent off for cash.

IN THE DAIRY BARN.

Do not ask the cow to make milk and keep herself warm with the same feed. At least give her a fair chance to be protected from the storms and then let her use the feed for milk making alone.

The cow is a machine that must convert food into milk. This is one reason why she should have such a large middle, for there is the place where the food must be worked over.

Milk that is kept clean and properly cooled needs no preservative.

Comfort is essential to profitable milk production, and a cow cannot be comfortable without good bedding. Don't forget the straw.

It pleases the cow to be milked quickly and gets her in the habit of giving down promptly. It is often the slow milkers that make the strippers.

THE DRAFT WEANLING.

Colts Need Feed That Will Develop Bone and Muscle.

Oats, preferably crushed or ground, is the best single grain to feed a weanling colt. Here at the station our weanlings have developed well when the grain ration was two-thirds by weight of ground oats and one-third ground corn, the hay being alfalfa. When the roughage is anything but a good quality of legume hay it is best to make the grain ration one-fourth to one-fifth bran, says Professor J. L. Edmonds of the Illinois experiment station. It is not possible to state in pounds just the amount of feed that will be required, but good, sound draft weanlings will pay handsomely if fed all the grain that they will clean up three times per day. Good quality of alfalfa and clover are the best roughages. They are growers of bone and muscle.

Weanlings ought not to be exposed to the elements at night or on the stormiest days. Access to a roomy, closed shed or run in furs in a rainy box will be found right. The run of a good blue grass field will afford exercise and some feed. Plenty of exercise in the open with the chance to grow a good coat is as essential as feed in making a good frame. Weanlings handled in this manner may look a bit shaggy, but they will do much better than the pampered kind. It is hard to feed too much if the feeding is done regularly and the opportunity for exercise is right. Puffy joints and cocked ankles, unless the tendency is strongly inherited, come from heavy feed and not enough play in the open. Weanlings do better when by themselves than when running and feeding with older horses.

Grooming when the bedding is plentiful is not much in need under this system. The feet should be regularly looked after at least once a month. A good hoof rasp is the proper tool with which to level up the foot. Don't let the toes get too long and keep the hoof wall slightly beveled on the outside to prevent splitting. Much can be done to remedy faulty conformation of legs by skillful and regular attention to the growing colt's feet. If the stable is clean and free from mites at the setting in of winter there is likely to be no trouble from lice. Free the colts from worms at the beginning of winter rather than wait for the foals to get out of shape generally.

IMPROVING THE FLOCK.

Crossbreeding Effective in Producing General Purpose Sheep.

Considering facilities for handling—such as lay of land, feed, shelter, size of flock to run together, etc.—each of the modern breeds of sheep has its qualities, peculiarities, adaptability, and some require more feed and care than others, but all can be used for a special purpose in crossbreeding or breeding up common stock.

The Delaine Merino excels in longevity, also in weight and fineness of fleece; but the lambs are not as good sellers on the fall market as the Down breeds. Yet the Merino blood is the cornerstone of the sheep industry. The long wool sheep, such as Cotswolds and Lincoln, raise a large marketable lamb, their wool is weighty and coarse and is often discounted. A cross between these fine and coarse wool breeds makes one of the best general purpose sheep for this country we have.

These half blood sheep shear a heavy fleece of medium wool, which brings the highest market price, and the lambs are better for market under the care of the average farmer than either of their full blood ancestors.

High class sheep are as beautiful in lines of form and style as are fine horses. So, after throwing out ill shaped sheep, the basic principle in studying your flock of ewes is the weight and quality of their wool and the value of the lambs they produce. If the flock is of two or more distinct types it may be necessary to divide it and use different rams until you can cull down and develop a uniform flock, which is most desirable. If your ewes are of good form and size, but shear light fleeces, or if their wool is coarse like the Lincoln or Cotswold a Delaine ram will increase the constitution and shearing qualities of the lambs. If your flock shears well, but ewes are small, get an Oxford or a Hampshire ram. If your dark faced ewes, which you perhaps call Shropshires, are short wooled and light boned use dark faced Oxford or white faced Rambouillet rams.

The Gain by Lying.
 Aristotle, being asked what gain was got by lying, replied: "The never being believed when one tells the truth."—Diogenes Laertius.

FOR IMPROVED POTATOES.

We Should Develop Better Varieties, Says the Department of Agriculture.

American progress in the development of improved varieties of potatoes has not been satisfactory as compared with the progress of leading European countries is the statement of the bureau of plant industry of the department of agriculture.

The best European varieties possess a better flavor, color and texture, particularly for boiling and frying, but these do not succeed when introduced into the United States. If private growers would engage in this work as they have in Great Britain, Germany and Austria, they would find it a fascinating industry and would undoubtedly make notable achievements.

In America we have much to accomplish in breeding a potato with a greater starch content. Our potatoes are now lower than the German varieties by from 4 to 8 per cent.

Our climatic conditions in America are so diverse that we need varieties of potatoes adapted to special localities. Particularly do we need a heat resistant strain that can more successfully withstand the high summer temperatures. Disease resistance is another quality that has been bred into certain foreign sorts, but is so lacking in ours that we have to quarantine absolutely certain foreign types that might bring disease with them.

The breeding of potatoes for different kinds of cooking might even be found profitable. A variety specially suited for baking is needed, another for frying; a close textured tuber is in some demand for salads. The housewife today finds it necessary to waste much good material in preparing her potatoes for the table, particularly the irregular, deep eyed sorts.

The use of commercial fertilizers universal in Germany is unknown in our western potato districts. Certain of our districts in Maine, New York and the Atlantic trucking belt have already found it to their profit to use more fertilizer, and potato growing is most prosperous in these sections. This should become more universal.

Crop rotation is of fundamental importance to the potato crop in controlling diseases and maintaining produce.

SPECIMENS OF AMERICAN POTATOES.

tion, but in the United States only the beginning of an ordered system has been made. Germany has a rotation of from three to seven years between potato crops. Nor has the importance of green manuring yet been fully appreciated in this country.

The problem of securing disease free seed has been met in Germany by an official inspection, which results in certificates being issued only to owners of disease free crops. Such a plan for the United States would be better if carried out by the co-operation of potato growers' associations, the state experiment stations and the United States department of agriculture rather than through legal enactment.

An Extraordinary Tragedy.

An extraordinary tragedy of superstition is reported from Burdwan, where a man named Vahamidan murdered his wife with her own consent in the course of a secret ceremonial. Vahamidan had for some time been learning the principles of Tantric worship from a monk. To complete his studies he needed a dead body, and on his assurance that he would restore her to life when he had finished his worship, the wife consented to be killed. The man is now in the hands of the police.

Took Names From Bees.

The bee is about the only insect that ever gained feminine namesakes. Deborah was a name given by the Hebrews for the bee, and owing to its popularity among the Puritans there is still to be found an occasional Deborah in the United States. Melissa, the Greek name for bee, is seldom found nowadays.

Toboggan Greased for Him.

As soon as any community gets the idea that a boy is bad, why, the boy generally gets bad just to prove it, whether he has ever done wrong before or not. It is the easiest way to go; public opinion has greased the toboggan and the boy takes the downward trip with very little inconvenience or scruple.

First to Manufacture Silk.

The wife of a Chinese emperor made the first silk in 2600 B. C. In 350 Aristotle first mentions silk among the Greeks. In the twelfth century the manufacture of silk was carried on in Sicily, later spreading to Italy, Spain and the south of France. It was not manufactured in England before 1604.

Good Help.

A 5 cent lump of smooth or rough pumicestone is a valuable help at the kitchen sink. Use it to remove all sorts of stains from the hands; also to scour off burnt food from granite ware. It will not chip the ware as a knife does, not injure in any way. It also cleans and at the same time sharpens steel knives.

CHINESE INFLUENCE NOTED IN TRIMMINGS FOR AFTERNOON GOWNS

If you would be strictly up to the mark tack an akret or bit of ostrich feather to the back of the bodice of your evening gown and let it wave gracefully above your head. Outline your tunic or the hem of your skirt with akrets or bits of ostrich. They are doing this in Paris. It is promised for the coming season that feathers of this description will take the place of fur for trimming purposes. Marabout akrets dyed to match the frock and tiny ostrich tips will trim the skirt as well as the chapeau.

For afternoon frocks borders and motifs wrought out in wooden beads or colored pearls will be popular. These are curious, but if wisely chosen are very chic and effective.

Dark tints are more or less favored for day-time wear.

One of the most favored silks is taffeta, in a quality as soft and supple as the old fashioned taffeta was stiff and hard.

No. 8153 is developed in a mossy green taffeta trimmed with a conventional border design worked out in silver thread and colored wooden beads. This design is well suited to a border trimming or a bordered material.

To copy this frock in size 36 it requires 4 1/2 yards of 36 inch material.

The costume shown in 8113-7857 is a Russian design made up in taffeta, striped and plain.

This design may be made in size 36 with 3 yards of 36 inch material for the blouse (8113) and 5 1/2 yards of 36 inch material for the skirt (7857).

No. 8153—sizes 34 to 46.
 No. 8113—sizes 34 to 44.
 No. 7857—sizes 22 to 30.
 Each pattern 15 cents.

To obtain either pattern illustrated fill out this coupon and enclose 15 cents in stamps or coin. Be sure to state number of pattern and size, measuring over the fullest part of the bust. Address Pattern Department, care of this paper.

FARM ORCHARD AND GARDEN
 BY F. E. TRIGG
 REGISTER, ROCKFORD, ILL.
 CORRESPONDENCE SOLICITED

[This matter must not be reprinted without special permission.]

Nineteen hundred and thirteen was the banner year in the history of coal production in the United States, the output being about 570,000,000 short tons.

There is one advantage in growing horseradish, and that is that it is so stout and pungent in odor and taste that most insects give it a mighty wide berth.

Roughly, skim milk gives a return of 40 cents a hundred pounds if fed to pigs, 60 cents if fed to calves and \$1 per hundred if fed to poultry. There ought to be a hint here for poultry raisers.

The yield of buckwheat in this country the past season was the smallest yield in thirteen years, due chiefly to summer drought and early frosts in New York and Pennsylvania, the two states that produce most of the crop.

The great opera singer Mme. Melba has a thousand acre ranch near the city of Melbourne, Australia, and on this keeps 150 pure bred Holstein cows. On retiring from her active professional work she intends to enter the dairy business more extensively.

The foliage plants will grow more thriftily and have a better color if they are placed in a window where they will get some sunshine. On the other hand, the several varieties of ferns thrive best in north windows or other places where they do not get direct sunshine.

Several of the common wild plants, including wild lettuce, dandelion, milkweed and others, have been found by chemical analysis to contain considerable amounts of good rubber. How to extract this element in commercial amounts and without too great cost is a problem that has not yet been solved.

One writer on agricultural topics observed a short time ago that the man who loafs in the country store while his wife is at home splitting wood ought to be fed on cold sauerkraut and head cheese. It will strike a good many that head cheese is too toothsome a dish to feed such a slob as this, and there will be many who will resent the implied insinuation touching the sauerkraut.

A good deal of argument has been presented of late against the use of the steel trap, and this was augmented the other day in a story which comes from Monrovia, Cal. A big trap that was set for a bear caught a pet dog whose mistress escaped it by but a few inches. The combined strength of two men was required to loosen the jaws so that the mangled paw could be released.

The other day there closed in Union township, Hancock county, O., a five weeks' rat hunt. Two hundred and thirteen men took part in the contest and produced 16,336 rat tails, the winners being given a dinner by the losers. The best killing in this campaign was made by a small rat terrier that had 2,000 tails to his credit, thirty of which he routed out of a single shock of corn.

Before any of our readers invest any of their hard earned coin in boom tracts anywhere in the country on the strength of raising hogs on cassava root at \$1.50 per hundredweight or fattening steers on cassava and spineless cactus leaves at \$1 per hundredweight they would do well to refer these figures to the department of agriculture at Washington for verification. These claims are so strong as to arouse suspicion as to their correctness.

Green food for the fowls in the winter months may be provided by sprouting grain. The grain should be soaked in water twenty-four hours, then drained. It should then be kept moist by sprinkling with warm water night and morning. When the grain starts to sprout it should be spread out to a depth of two inches. In two weeks the sod should be three or four inches thick and the growth of the green shoots six or seven inches high. It is then ready to feed and should be given in moderate quantities.

The folly of burning straw to get rid of it is realized when one knows what a ton of straw contains. Analysis shows that a ton of wheat straw contains 230 pounds of nitrogen, 80 pounds of phosphoric acid and 240 pounds of potash, while a ton of oat straw contains about 240 pounds of nitrogen, 80 pounds of phosphoric acid and 360 pounds of potash. The burning of straw means the destruction of most of the first two elements named; but, what is almost as vital, it means robbing the soil of the vegetable matter—humus—of which it is so much in need.

Surgical Operation.
 The customer raised his hand, and the barber, pausing in the operation of shaving him, inclined his head. "Sir?" "Give me gas," said the customer.

ROYAL Baking Powder Absolutely Pure

Royal Baking Powder is indispensable to finest cookery and to the comfort and convenience of modern housekeeping. Royal Baking Powder makes hot breads, cakes and pastry wholesome. Perfectly leavens without fermentation.

ROYAL BAKING POWDER CO., NEW YORK

ADDS \$2,000,000 TO PEACE FUND

Carnegie Organizes Church Union to Expand Income.

BISHOP GREER PRESIDENT

Influence of the Churches Will Be Used to Substitute Arbitration For War.

New York, Feb. 11.—Andrew Carnegie set aside \$2,000,000 as a fund, the income of which is to be used by the churches of America in an effort to bring about universal peace.

With a board of trustees, consisting of thirty-nine members, consisting of cardinals, archbishops, bishops of many denominations, moderators, rabbis, presidents, distinguished authors, publicists and peace workers, the \$2,000,000 income arising from the Carnegie corporation first mortgage bonds is to be utilized to further international good will and foster peace education, primarily with the object of having the Teutonic nations—Germany, Great Britain and the United States—to take the first step by agreeing solemnly to submit all disputes to arbitration, the other powers joining later, according to Mr. Carnegie himself.

The method will be the supplying the clergy of the United States and Europe with all information of the progress of peace; in securing sermons on international peace in all churches; in arranging conferences between the clergy of the nations; in exchanging pastors and in arranging for friendly visits between the different nations; in bringing the pressure of the church to bear upon measures looking toward the substitution of arbitration for war, and in such other ways as the trustees may think best.

Mr. Carnegie made his announcement at a luncheon at his home, at which all the trustees were present except Cardinal Gibbons, Archbishop Glennon and Rabbi Hirsh.

The trustees held their first meeting in the library of Mr. Carnegie's home, and after accepting formally the fund, passed resolutions that the endowment be called "The Church Peace Union (founded by Andrew Carnegie)."

They made Bishop David Greer president, Rev. Frederick Lynch secretary and director, Rev. William Merrill vice president, and George A. Plimton treasurer.

BANK WRECKER IN JAIL

Won't Accept Aid, Saying He Is Guilty and Ready to Take Punishment.

Memphis, Tenn., Feb. 11.—C. Hunter Raine, president of the Mercantile bank here, arrested on the charge of embezzlement after the discovery of defalcations of more than \$1,000,000, prepared to become accustomed to the routine of jail life.

Raine has refused all offers of his friends to arrange bail for him, saying he is guilty and ready to take his punishment. He also has refused to retain legal counsel.

While the first announcement had placed the amount of Raine's shortage at about \$500,000, figures given out show that this already has been increased to nearly \$1,000,000. It is stated by bank officials that the defalcation may reach close to \$1,500,000.

Definite figures will not be known until the state bank examiners, working under J. L. Hutton, superintendent of banks, have completed their work.

GOOD ROADS BILL PASSES

Shackelford Measure, Carrying \$25,000,000, Goes Through House.

Washington, Feb. 11.—The Shackelford good roads bill was passed by the house, 322 to 42.

The bill, which now goes to the senate, appropriates \$25,000,000, to be divided \$65,000 to each state and the remainder among the states on the basis of population and the number of miles of post roads.

Each state must co-operate by appropriating a dollar for every dollar furnished by the federal government.

Veteran Found Starving.

Berwick, Pa., Feb. 11.—Starving, half-naked and crazed with the cold, Stephen Varner, an old soldier, aged seventy-four years, was found crawling about his lonely shanty in Varner's Hollow. The old man was nearly dead and is now in a critical condition in the Berwick hospital. There was no food or fuel in the house.

Loses Life Doing Friend a Favor.

Derby, Conn., Feb. 11.—His efforts to assist a young woman friend in cranking her automobile cost Bennett Treat, sixty-eight years old, his life. He was walking along the street when he saw his friend in trouble and went to her assistance. The crank flew back and broke his arm in two places. Infection developed and death resulted.

Dual Personality in Tango Teacher.

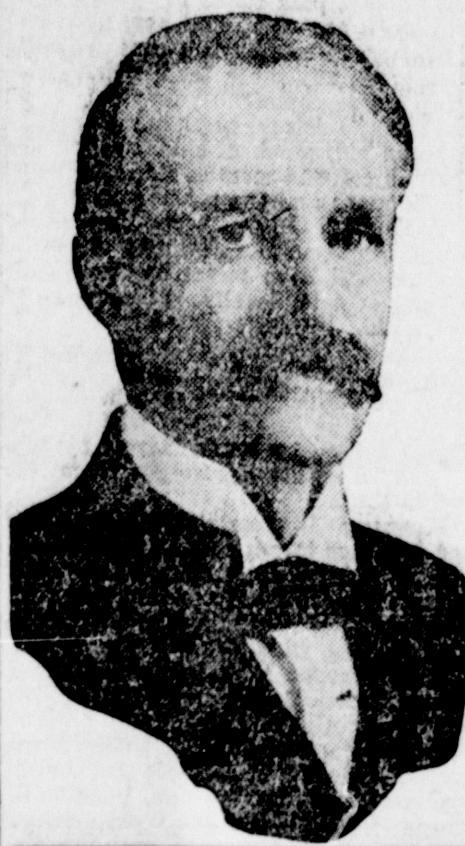

Milwaukee, Wis., Feb. 11.—Tango teacher and daring burglar form the dual personality of Herman Zastrow, according to the police. Zastrow is charged with robbing Milwaukee's most fashionable summer homes. He was wounded several weeks ago when attempting to enter a residence.

Inaudible at Last.

Among those things that go without saying may be included the language of deaf mutes.—Puck.

GIFFORD PINCHOT.

Progressive Candidate For United States Senate.

BIBLE NOT READ IN SCHOOLS, CHARGED

P. O. S. of A. to Try to Enforce Act in Pottsville.

Pottsville, Pa., Feb. 11.—Members of the seven camps of the P. O. S. of A., comprising the district of Lower Schuylkill, met in the rooms of Camp 36, of Pottsville, and held a consultation regarding the enforcement of the act which requires the reading of the Bible in the public schools.

The meeting, after legal advice from the state camp's attorney, Richard Woods, of Carlisle, decided to appoint a delegate from each of the camps to form a committee which will take up the matter.

The matter will be placed in the hands of Nathan C. Schaeffer, state superintendent of public instruction, who can enforce the law by means of his authority, which allows him to hold up appropriations to the schools where the school legislation is not obeyed. It is said a number of school boards in Schuylkill county persist in refusing to enforce the law.

The meeting was attended by a number of officials, among whom were State President Samuel C. Wells, State Vice President Herman Miller, of Easton, and ex-State President Reese, of St. Clair. The meeting was presided over by District President T. D. Starr, of Minersville.

MEXICAN BANDIT CAPTURED

Castillo, Responsible For Cumbre Tunnel Disaster, Is Caught.

El Paso, Tex., Feb. 11.—A dispatch to the Times correspondent from a staff correspondent at Cumbre carries the report that Maximo Castillo, the bandit held responsible for the Cumbre tunnel disaster, has been captured with the remainder of his band.

The capture is said to have been made at Gabalin ranch, a few miles east of Pearson. The report adds that the prisoners will be taken to Casas Grandes.

Emilio Garcia, one of Castillo's bandits, was captured near Hachita, on the New Mexico border, and turned over to the United States military authorities.

DIAMOND STATE STEEL SOLD

Plant Formerly Valued at 3,000,000 Goes For \$208,000.

Wilmington, Del., Feb. 11.—Daniel J. Driscoll, of Reading, Pa., bought the plant of the Diamond State Steel company, sold at receivers' sale, for \$208,000. The plant was formerly valued at \$3,000,000.

Mr. Driscoll proposes to operate the plant. He, with Howard T. Wallace, of Wilmington, formerly the president of the property, are interested in the Delaware Seamless Tube company, of near Reading, Pa.

Patients Saved From Fire.

Milwaukee, Feb. 11.—Forty-five panic-stricken patients of the City Sanatorium for Tuberculosis were rescued from a fire which destroyed the institution. The loss was \$50,000.

WEATHER EVERYWHERE.

Where Silence Reigns.

Two sadly afflicted husbands were discussing the marriage of a former widow. The first one sighed, turned to his fellow sufferer, and exclaimed: "How is it that widows generally marry again?" The answer came quickly: "Because dead men tell no tales."

Winning Success.

Individual success depends not on laying grand plans for the future, but on doing absorbingly and to the very best of our ability our daily work.

PUBLIC SALE

ON TUESDAY, MARCH 17th, 1914.

Burnt Aluminum Pans.

If your aluminum pans or kettles get scorched and black do not scrape or scour them. Half fill with water, add a heaping teaspoonful of soda and boil for ten minutes; they will be as bright as new.—Good Housekeeping Magazine.

FARM WORK IN WINTER.

The hired help is usually busy enough until deep snow falls or during stormy winter weather. Then the farmer uses his wits to find work that will be worth while as well as just keeping the man busy. Of course there is the wood lot. But the pushing farmer plans to get most of the wood cut before deep snow. Very deep snow makes hauling the wood home or to market sometimes out of the question for a long time. During certain kinds of weather there is little outdoor work that can be done. Sometimes a determined man tackles a job of draining wet land in winter. Springing land does not hold much frost and can be worked almost any time, but a hired man who will dig drains in winter is a jewel indeed. The usual plan is to provide some work around the buildings. There are fruit and vegetable pits to pick over and grade, floors, locks, gates, fences, stalls and pens to be repaired, whitewashing and painting to be done inside, wagons and tools to mend and put in working order. Tools, knives and cutters need to be ground, tool rooms and workshops to be put in order, fruit barrels and boxes to be cleaned and fitted with heads or tops, granaries to be made rat proof, cellars to be enlarged, feeding troughs and cow stalls to be made, small chicken coops and nests to be got ready.

If only the hired man is handy with tools he can be kept very busy in winter at work under cover which will help save and make many a dollar during the first rush of the busy season. Whenever the ground thaws for a few days will be a good time to set posts and gates, dig pits for hot-bed sashes, transplant large trees and drag rocks from the surface of the fields.

BOYS' PIG CLUB.

A New Organization Started by Department of Agriculture.

The department of agriculture has its Boys' Corn club and its Girls' Canning club and now comes the Boys' Pig club, being organized in the south for the purpose of increasing the supply of pork and encouraging good breeding of hogs. Already clubs have been organized in Alabama and Louisiana, and a club organization has been started in Georgia. It is the purpose of the officials of the department to organize clubs in every southern state.

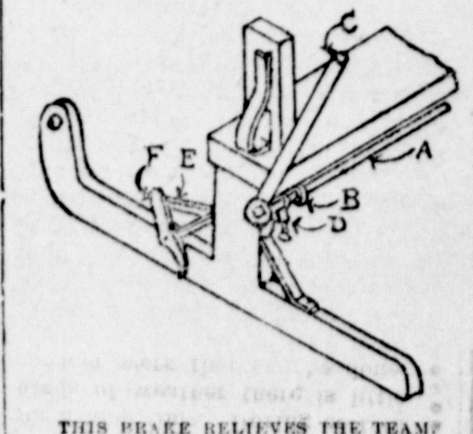

The idea of the organization started with the farmers' co-operative demonstration and has been carried on with the co-operation of the animal husbandry branch of the bureau of animal industry. The organization is an offshoot of the Boys' Corn club, which has an organization in every southern state and which has been the means of producing record breaking yields of corn. The Pig club when thoroughly organized will, it is expected, work hand in hand with the Corn club. The boys of the latter will produce the corn, and the boys of the newly organized association will see to it that the pigs are produced to eat the corn.

In connection with the organization of the Pig club the department makes the following statement: It is the purpose of the department to have every member of the club encourage not only an increased production of the swine family, but a better breed of pigs than is being raised at present. It is a serious purpose of the officials of the department are engaged in one that is aimed at the high cost of living.

The production of pork is not keeping pace with the increased population, and something must be done to harmonize these two elements. If each member of the club—and they will be growing, it is expected, all the time—will see to it that one more pig and a better pig is produced each year, then a long step will have been taken in meeting the ever growing chasm between pork production and increased population.

A Homemade Sled Brake.

A sled brake can be made, as shown in the accompanying illustration, that will take the load from the team when descending hills. To make this brake a round bar, A, is fastened to the front hub with heavy eyes, as shown at B.

THIS BRAKE RELIEVES THE TEAM. The Iowa Homestead. A square head should be formed on the outer end, over which is placed the lever C, by which the brake is operated. A lug, D, is made fast to the bar A and drops down four or five inches with a hole in its lower end, to which is bolted the bar E, which in turn is bolted to the dog F. By pushing forward the lever C the dog F is lowered below the runner and catches in the snow or ground, thus acting as a brake.

More Than One Way.

"To cure warts," says a Chicago doctor, "burn them out with a red hot pin." Another method is to put in a charge of dynamite.

Some Garments Still Here From Our Sacrifice Sale

Our overcoat stock still contains many fine garments that we will sell at one fourth off former prices.

In Suits we have many desirable offerings, Winter is not yet past and the early buyers will get the pick.

Underwear and Sweaters correspondingly reduced.

We give "S & H" Green Trading Stamps

HUDSON Sixes

Six-40 \$1750 F. O. B. Detroit Six-54 \$2250

54 of the 79 Automobile exhibitors at the 14th National Automobile Show held in New York Jan. 3 to 10 this year, displayed six-cylinder cars. Eighteen showed Sixes exclusively.

That emphasizes the dominance of Sixes.

Come Drive This Light Six

—you men who know only four-cylinder sensation should drive the HUDSON Six-40. It rides like constant coasting. In price, weight and fuel cost it is below any same-class Four.

The price is \$1750, f. o. b. Detroit.

This weighs 2,980 pounds—400 pounds less than last year's HUDSON "37." And it consumes one-fourth less fuel. Yet the HUDSON "37" was a four-cylinder car, with shorter wheel base, smaller capacity and lesser power.

Some Fours of like capacity weight 40 per cent. more and consume at least one-third more fuel.

This means that the Six—the envied type—the smooth-running flexible, luxurious Six—undersells, in every way, any same-class Four.

It means that you men who want quality-cars, modest in price and weight and upkeep, are no longer compelled to be content with a Four.

The Handsomest Car

The HUDSON Six-40 is, in addition, the handsomest design of the year. The design and equipment are almost identical with the new HUDSON Six-54.

It has a streamline body of the most distinguished type. Extra tires are carried ahead of the front door. The gasoline tank is in the dash. There are two extra disappearing tonneau seats. Hinges and speedometer gear are concealed.

It has the convenient new "One-Man" top, with quick-adjusting curtains attached. It has dimming searchlights, hand-buffed leather upholstery. No last year's car, at any price, offered so many attractions.

Not Enough for All

The evidence is that the demand for this car will far exceed the output. The sale so far has broken all HUDSON records. So we urge you who may want it to come now and inspect it. Come anyway, if only to see the new features of this year's first-class cars.

Hyomei should be in every household. Druggists everywhere sell it. Ask for the complete outfit—\$1.00 size.

Identify Men by Veins.

Professor Tamassia of the University of Padua, advocates the adoption of an identification system the basis of which is the photographing of the veins of the hands. He says the merest novice can detect variations, while long training is necessary to distinguish differences in finger prints.
